

Mobile app (IOS and Android)

Version 2.3.0

- Redesign of the user interface
- Show locations only on Home screen (without traps and their status)
- Added show devices button per location, to show the traps status for that location
- Link to LocationScreen by clicking on Name, Address in the HomeScreen
- Search function on HomeScreen searches through all locations (also non displayed locations)
- Added button to clear search text on HomeScreen
- Search bar on ChooseLocationScreen
- Changed 'pull to refresh'behaviour on HomeScreen

Web portal

Version 1.3

- Redesign of the user interface (please remove website cache in case 'blue icons are shown')
- Search Trap using a bar code scanner
- Export trap information from location X at customer Y in a separate csv file
- Fixed missing voltage and temperature information in Trap overview screen
- Preselect the chosen location in the measurement export screen
- Sort locations alphabetically in the measurement export screen
- Show account holder name above shared location
